| Box No. II sheet) | The same was a substitute of the same and the same of | | | | |
|---|---|--|--|--|--|
| | ional search report has not been established in respect of certain claims under Article 17(2)(a) for the following | | | | |
| reasons: | " " " " " " " " " " " " " " " " " " " | | | | |
| 1. | Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely: | | | | |
| 2. | Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically: | | | | |
| 3 | Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule | | | | |
| Box No. III | Observations where unity of invention is lacking (Continuation of item 3 of first sheet) | | | | |
| This International Searching Authority found multiple inventions in this international application, as follows: Please See Continuation Sheet | | | | | |
| 1. | As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.: | | | | |
| 4. | No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: | | | | |
| Remark on I | The second role accompanied by the applicant a protest. | | | | |
| No protest accompanied the payment of additional search fees. | | | | | |

INTERNATIONAL SEARCH REPORT

International application No. PCT/USO4/21621

BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.

Group 1, claim(s) 1-4 and 11, drawn to a method for limiting access to non-volatile digital storage contained in a device executing instructions in a Touring-complete interpreter.

Group 2, claim(s) 5-7, drawn to a digital optical storage medium containing encrypted audiovisual content playback on any of a plurality of device architectures.

Group 3, claim(s) 8-10, drawn to an automated method for enabling a playback device containing a nonvolatile memory to determine whether permission to use digital optical disk media has been revoked.

The inventions listed as Groups 1-3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group 1 includes limitations directed towards access control via authentication of a hash value of executable instructions, Group 2 is directed towards an optical disk with a playback program encoded thereupon which when executed determines which of a plurality of security weaknesses are present in a playback (executing) device, Group 3 is directed towards limiting access to a digital storage medium via determining if an instance of permission to utilize the medium has been revoked based upon reading an identifier from the medium and comparison with a revocation list.

No generic linking claim(s) is found in the claim groups.

The 3 claim groups are independent and distinct from one another as per MPEP Sec. 802.21 and within the meaning of 35 USC 121.

The requirement for unity of invention referred to in Rule 13.1 is not met. There is no technical relationship among the 3 inventions claimed in claim groups 1-3 involving one or more of the same or corresponding technical features.
